Is the project permitted as a net metering system?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
Is the project already selling its output to VEPP Inc. or the Vermont electric utilities?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO

2021 STANDARD OFFER RFP APPLICATION

IV. CERTIFICATIONS

By signing below, proponent hereby certifies the following:

If proposed project is wood biomass, we hereby certify that we are proposing a project with a design system efficiency (the sum of full load design thermal output and electric output divided by the heat input) of at least 50%.

If proposed project is food waste, we hereby certify that the proposed food waste anaerobic digestion project will be fueled greater than 50% by volume from food residuals as defined in 10 V.S.A. § 6602(31).

If proposed project is located at, adjacent to, or near an existing or proposed renewable energy generation facility, proponent hereby certifies that the two facilities would be considered separate project under 30 V.S.A. § 8002(18).

Proponent hereby certifies that it has site control of the land on which the proposed project will be constructed.

Harriman Reservoir Minimum Flow Project: 1.7 MW New Hydro, Technology Diversity Developer Block

Applicant:

Great River Hydro, LLC
112 Turnpike Road, Suite 202
Westborough, MA 01581

Lead Project Contact:

Rebecca Acosta
Director, Renewable Energy Markets
racosta@greatriverhydro.com (508)-769-4814

Introduction:

Great River Hydro, LLC (GRH) hereby submits the following proposal in response to the State of Vermont Request for Proposals for the Standard Offer Program, issued on May 24, 2021, by VEPP Inc. acting as the Standard Offer Facilitator (RFP). GRH is seeking to develop a new 1.7 MW hydropower unit at its existing Harriman Dam in Whitingham, Vermont, which will be capable of fulfilling the RFP's entire 1.2994 MW 2021 Standard-Offer Program Capacity Allocation under the New Hydroelectric Technology Diversity Developer Block, to be delivered around the clock. GRH is submitting this project at \$0.1299 per kilowatt fixed for 20 years for the 1.2994 MW of capacity available under the RFP.

About Great River Hydro:

Great River Hydro is New England's largest conventional hydropower generator. As a privately held independent power producer, GRH owns and operates 13 generating stations and 3 storage-only reservoirs located along the Connecticut and Deerfield Rivers in New Hampshire, Vermont, and Massachusetts. Unique to New England, our system pairs vast amounts of reservoir storage with highly coordinated, sequentially located facilities that efficiently use the water multiple times as it travels downstream. GRH's entire fleet is operated remotely around the clock from our Renewable Operations Control Center located in Wilder, Vermont. Our 589 megawatts (MW) of nominal capacity generates an average of approximately 1.6 million megawatt-hours (MWh) of carbon-free, renewable energy every year. Eleven of our 13 generating stations are certified by the Low Impact Hydropower Institute.

Project and Site Overview:

GRH is proposing to construct and operate a new 1.7 MW unit at its Harriman Dam in Whitingham, Vermont, for the primary purpose of generating new renewable energy from the required minimum flow currently passed at the dam without generation. The Harriman Reservoir Minimum Flow Project (HRMFP) will minimally increase net hydraulic capacity of Harriman Dam without substantially altering GRH's other Deerfield River project operations. Most importantly, the HRMFP will generate an estimated 10,000 MWh of new renewable energy each year. The capacity factor of the HRMFP will be high – approximately 95% – because the water that will be used to generate the energy is required to be passed around the clock all year from a reservoir with vast storage capacity. Furthermore, GRH is proposing to increase the size of the new unit to optimize its generating capacity at this location, which will have the added benefit of increasing the flows in the bypassed reach above the minimum requirements and thereby improving the aquatic habitat in those 4.5 riverine miles downstream.

The Harriman Reservoir Minimum Flow Project proposes to install a new hydroelectric generating unit, either in line of the existing minimum flow valve vault or in a newly constructed powerhouse to be located at the downstream spillway exit. Interconnection will

likely be with the Village of Jacksonville Electric Company. The Harriman Reservoir Minimum Flow project will be commercially operable in accordance with 30 V.S.A. § 8005a.

Application Requirements:

The proposed plant will be located in Whitingham, Vermont and will have an installed net AC capacity of 1.7 MW, below the defined limit set in V.S.A. § 8002(19).

Furthermore, as a wholly new hydro unit with a new and wholly separate interconnection, the Harriman Reservoir Minimum Flow Project is not already selling its output to VEPP or Vermont Distribution Utilities.

The proposed price for this project will be for \$0.1299 per kilowatt (fixed for 20 years), which is not higher than the hydro-specific price cap presented in the RFP.

A proposal security check for \$17,000 (\$10/kW), payable to “VEPP Inc. – In Trust”, with a 180-day expiration, is included with this proposal, along with a complete and signed 2021 RFP Application form.

Great River Hydro, LLC certifies that it has site control of the land on which the proposed plant will be constructed by virtue of its deed dated March 24, 2005, recorded with the Whitingham Land Records in Volume 125, Page 319.

Great River Hydro, LLC further certifies that the Harriman Reservoir Minimum Flow Project would be considered a separate plant from the existing Harriman Station under 30 V.S.A. § 8002(18) because it will be separately constructed approximately 100 years later than the existing plant, will be located 2.5 linear miles from Harriman Station, will have wholly separate interconnection facilities, and will be controlled and operated independently from the existing Harriman Station, or as otherwise determined.

Respectfully submitted,

Scott D. Hall

President & CEO

Great River Hydro, LLC

IV. CERTIFICATIONS

By signing below, proponent hereby certifies the following:

If proposed project is wood biomass, we hereby certify that we are proposing a project with a design system efficiency (the sum of full load design thermal output and electric output divided by the heat input) of at least 50%.

If proposed project is food waste, we hereby certify that the proposed food waste anaerobic digestion project will be fueled greater than 50% by volume from food residuals as defined in 10 V.S.A. § 6602(31).

If proposed project is located at, adjacent to, or near an existing or proposed renewable energy generation facility, proponent hereby certifies that the two facilities would be considered separate project under 30 V.S.A. § 8002(18).

Proponent hereby certifies that it has site control of the land on which the proposed project will be constructed.

IV. CERTIFICATIONS

By signing below, proponent hereby certifies the following:

If proposed project is wood biomass, we hereby certify that we are proposing a project with a design system efficiency (the sum of full load design thermal output and electric output divided by the heat input) of at least 50%.

If proposed project is food waste, we hereby certify that the proposed food waste anaerobic digestion project will be fueled greater than 50% by volume from food residuals as defined in 10 V.S.A. § 6602(31).

If proposed project is located at, adjacent to, or near an existing or proposed renewable energy generation facility, proponent hereby certifies that the two facilities would be considered separate project under 30 V.S.A. § 8002(18).

Proponent hereby certifies that it has site control of the land on which the proposed project will be constructed.

II. PROPONENT CONTACT INFORMATION		
PROponent LEGAL COMPANY NAME The Wilder One LLC		
ORGANIZATION TYPE [Corporation, LLC, etc.] LLC	ORGANIZED AND EXISTING UNDER THE LAWS OF THE STATE OF Vermont	
BUSINESS MAILING ADDRESS PO Box 1204		
CITY Manchester Ctr.	STATE VT	ZIP CODE 05255
CONTACT PERSON NAME AND TITLE Thomas Hand, Manager		
PHONE NUMBER 802-688-3776	E-MAIL Thomas@MHGsolar.com	

III. THRESHOLD REQUIREMENTS	
Is the project nameplate capacity 2.2 MW or less?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
Is the project located in Vermont?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
Is the bid price at or below the avoided cost cap?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
Is the project commissioned on or after 9/30/09?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
Is the project permitted as a net metering system?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
Is the project already selling its output to VEPP Inc. or the Vermont electric utilities?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO

2021 STANDARD OFFER RFP APPLICATION

IV. CERTIFICATIONS

By signing below, proponent hereby certifies the following:

If proposed project is wood biomass, we hereby certify that we are proposing a project with a design system efficiency (the sum of full load design thermal output and electric output divided by the heat input) of at least 50%.

If proposed project is food waste, we hereby certify that the proposed food waste anaerobic digestion project will be fueled greater than 50% by volume from food residuals as defined in 10 V.S.A. § 6602(31).

If proposed project is located at, adjacent to, or near an existing or proposed renewable energy generation facility, proponent hereby certifies that the two facilities would be considered separate project under 30 V.S.A. § 8002(18).

Proponent hereby certifies that it has site control of the land on which the proposed project will be constructed.
