Re: Case No. 21-4085-INV
Investigation to Review the 2022 Standard-Offer Program

Dear Ms. Anderson:

VEPP Inc., acting as Standard Offer Facilitator, respectfully requests resolution of the following end-of-program questions to be addressed in the Investigation to Review the 2022 Implementation of the Standard-Offer Program.

1. After the final request for proposals is released in 2022, is the program also effectively closed for technologies outside the statutory program cap of 127.5 MW? If not, will farm methane and existing hydroelectric plants still be allowed to request a contract at any time?
2. Does the 127.5 MW statutory program cap contemplate 127.5 MW *built* or 127.5 MW *solicited*? If the Public Utility Commission decides 127.5 MW *built* is the statutory intent, what procedures will apply in the event there is project attrition?

Thank you for the opportunity to provide these comments.

Best regards,

VEPP Inc.

C. Alderman
